Immediate Release

LKPB Engineers' Michael Morris Promoted to Associate

Saint Paul, Minnesota (February 12, 2010) – LKPB Engineers, Inc. (LKPB) has promoted mechanical engineer Michael Morris, P.E., to Mechanical Department Associate. Morris started at LKPB in 2005. He is a project manager providing services for recreational, educational, industrial, health care and institutional facilities, from concept stage through construction.

According to LKPB President Peter Potvin, “Many of our clients want to be environmentally responsible. Mike is great at helping them understand sustainable design options for a project and how to implement those options in a cost-effective manner that will both work within their budget and provide long-term value.”

Prior to LKPB, Morris worked as a project engineer for a Wisconsin engineering firm. His recent work for LKPB includes Silverwood Park Visitor's Center, Minneapolis, the Mayo Clinic's Dan Abraham Healthy Living Center, Rochester, and the Dakota State University Habeger Science Addition, Madison, South Dakota.

Morris completed his mechanical engineering degree at the University of Wisconsin Madison. He attained his Leadership in Energy and Environmental Design Accredited Professional status in 2009. Morris is a licensed professional engineer in Minnesota and South Dakota.

LKPB Engineers, Inc. (LKPB) is a Saint Paul-based mechanical and electrical engineering consulting firm. Established in 1969, LKPB has decades of engineering experience and provides award-winning service for clients in the corporate, academic, entertainment, government, health care, industrial, recreational, religious, residential and retail sectors. For more information, visit www.lkpb.com.
