ATS&R Coordinates Design Work in Abu Dhabi

Minneapolis, MN – March 29, 2010 – ATS&R Planners/ Architects/ Engineers recently coordinated design work for the Innovation School for the Abu Dhabi Water and Electricity Authority (ADWEA). ATS&R Partner Paul Snyder spent the month of December working with all the disciplines associated with the design and documentation of this project.

The project site is located in the heart of Abu Dhabi on the site of a previous industrial complex owned by ADWEA. Designed for 1,800 K-Grade 13 students, the campus encloses 19,250 square meters (207,205 square feet) and provides residential accommodations for the faculty. ATS&R also submitted designs for FF&E and technology services for this school of the future.

As Director of International Architecture, Snyder and ATS&R have also served as consultants, planners, and designers for 28 new schools and 100 additions/renovations for the USAID Jordan School Construction and Renovation project in 2006.

ATS&R is an architecture and engineering firm specializing in educational facility design since 1944. The firm's services include architecture, educational facility planning, mechanical engineering, electrical engineering, interior design, technology, site development, field administration and total energy checkpoint.
