**STAHL FIELD SUPERINTENDENT EARNS LEED® PROFESSIONAL ACCREDITATION**

MINNEAPOLIS—July 27, 2009—Stahl Construction's Bradley Coulter, Field Superintendent, recently achieved LEED® Professional Accreditation. Bradley joins Stahl's ten other LEED® APs and is Stahl's second field superintendent to attain this accreditation.

LEED® Accredited Professionals have demonstrated a thorough understanding of green building practices, principles and possess a familiarity with LEED® requirements, resources, and processes.

Coulter's comprehensive understanding and commitment to green building practices will benefit Stahl and its clients as the commercial construction industry continues to support and require environmentally friendly building designs and processes.

The LEED® Green Building Rating System is the nationally accepted standard for the design, construction, and operation of high performance green buildings. LEED® AP's give building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance in five key areas: sustainable site development, water savings, energy efficiency, materials selection, and indoor environmental quality.
